

721  
a first dispensing opening in the panel, the first closure being configured to at least partially cover the first dispensing opening; and

a second dispensing opening in the first closure, the second closure being configured to cover the second dispensing opening.

722  
9. (Twice Amended) A closure for use with a container, comprising:  
a panel comprising a first flap and a second flap, the panel being configured to latch the second flap in an open position; and

a dispensing opening in the panel, the first flap being configured to reduce a size of the dispensing opening, the second flap being configured to close the dispensing opening.

723  
23. (Twice Amended) A closure for use with a container, comprising:  
a panel comprising a first flap and a second flap, the panel being configured to latch the second flap in an open position;

a first dispensing opening in the panel; and  
a second dispensing opening in the first flap, the first flap being pivotal between an open position exposing the first dispensing opening and a closed position modifying the first dispensing opening to the second dispensing opening, and the second flap being pivotal between an open position exposing the first flap and the second dispensing opening and a closed position covering the first flap and the second dispensing opening.
